

Eisai Innovation Center BioLabs

Pioneering Innovation in Neurology

Why Choose Eisai Innovation Center BioLabs?

Eisai Innovation Center BioLabs (EICB) is a boutique biotech accelerator located in the Alewife neighborhood of North Cambridge, right in the heart of this rapidly transforming hub for life sciences companies. EICB uniquely provides the most prominent emerging biotech companies with **broad and tailored state-of-the-art capabilities** to help them pursue the development of transformative therapies, devices and digital solutions for patients living with life-altering disorders.

Eisai opened this incubator as part of its relentless pursuit of a cure for neurological diseases and the fulfillment of its *human health care* mission, **EICB can simultaneously accommodate five to seven companies in its nearly 6,000 square foot space**, providing access to cutting-edge technology for companies forging the future of research and innovation.

Co-located in the same facility as the Eisai Center for Genetics Guided Dementia Discovery (G2D2), EICB's modern, functional design enables the impactful fusion of resident companies and the ecosystem, with a range of facility offerings. To holistically meet their needs beyond laboratory space and equipment, EICB also offers residents office, meeting and event space.

Recognizing that the needs of its residents extend beyond R&D, **EICB connects companies with the full BioLabs network** of strategic partners, technology sponsors, advisors, capital connections and other resident companies. EICB also offers full-service, turn-key operational support from BioLabs and their procurement platform. These services free up time for start-ups to focus on advancing their innovation and reaching key milestones, **helping them to fulfill their goal.**

Eisai Innovation Center BioLabs is part of BioLabs, the global operator of premier shared co-working spaces, located in key biotech innovation clusters and designated exclusively for life sciences entrepreneurs to develop their early-stage companies to high potential ventures. BioLabs was founded by entrepreneurs with decade-long track records of success launching, operating and investing in life sciences companies. Recognizing the critical need to address the evolving needs of patients around the world, BioLabs recently expanded its footprint internationally, launching sites in Paris and Heidelberg.

Equipment

On-demand, shared
equipment.

Membership and Services Benefits

Eisai Innovation Center BioLabs, in addition to offering flexible and fully equipped coworking lab and office space, provides the below listed services and amenities:

Ready-to-use Lab Facilities

Fully equipped Tissue Culture Room

Biosafety Cabinet	Inverted Microscope
CO ₂ Incubators	Centrifuge
Digital Fluorescent Cell Counter	Water Baths
Fluorescent Microscope	4C Shared Fridge

Common Equipment

Thermal Cyclers	Centrifuges	Thermomixers
qPCR Machine	Bacterial Shaking Incubator	Electrophoresis Apparatus
Plate Readers	pH Meter	iBlot™ 2 Transfer Device
Attune Flow Cytometer	Balance Station	Vacufuge
DeNovix Nucleic Acid Analyzer	Vortexes	Pipette Bundles
iBright Imaging Station	Hotplates	Rockers
LI-COR Imaging Station	Water Baths	

Storage

-80C Freezers	4C Refrigerators
-20C Freezers	Liquid Nitrogen Storage

Operational & Administrative Support

Procurement	Maintenance of Common Areas	Shipping & Receiving
IT Support	Hazardous Waste	Mail Delivery
Internet Access	Biological Waste	Visitor Management
Security Access	Lab Glass Washing	Building Utilities
Biosafety Permits	Lab Autoclave	Lab Utilities
Flammable Permits	Dry Ice/Flaked Ice	Cleaning
EH&S	Milli-Q® Water	
	Lab Coat Service	

Office Space & Site Facilities

Office Space

- Lockable Cabinets
- Minimal Office Supplies
- Access to Meeting Rooms
- Videoconference Rooms

Cafeteria

- Coffee/Tea
- Vending Machine
- Cable TV
- Booth Seating with Monitor

Site Facilities

- On-site Fitness Center
- Lounge (Foosball/Shuffleboard)
- Open Seating Area
- Bike Storage
